

Environmental Policy

Colas South Africa aims to minimize the environmental impact of its operations, of the manufacture and supply of bituminous road binders, by preventing pollution and striving for continual improvement in its environmental performance whilst working towards more sustainable operating practices.

Protection of the environment is the responsibility of all staff and is of integral importance in the manner in which we undertake our business operations. The management of each business unit is responsible for ensuring that appropriate arrangements are made and resources provided for the fulfilment of this policy and for monitoring its implementation and effectiveness.

In order to minimize environmental impacts concerning our activities, products and services, we shall;

- Comply with all applicable legal requirements, industrial and other requirements to which the company subscribes, which relates to its environmental aspects.
- To promote innovative products and designs that are more environmentally friendly, and that promote clean energy, applying techniques which replace and use less natural resources (Aggregate, bitumen, fuels, water, ...), in addition to reducing noise and dust emissions.
- To include the consideration of environmental issues in all business strategies and initiatives.
- Report, investigate and take action to address environmental incidents and community complaints.
- Prevent pollution, reduce waste and minimize the consumption of natural resources.
- Ensure that our Environmental Management System is documented and are adhered to by all our employees.
- Strive to continuously improve our management system and consider improved technology and production changes to enhance the environmental performance of the company.
- Set objectives and targets to improve our environmental performance e.g. to minimize consumption of fossil fuels and therefore minimizing Colas South Africa's carbon footprint.
- Work in partnership with local communities and be a responsible neighbour.
